217	10.5.1 Scoring Cost Proposals	Please confirm the formula expressed in the RFP: "Bidder's cost score = (lowest cost/bidder cost) x maximum points" will be used to <u>separately</u> score both implementation costs and fixed price operations costs and the sum of these two scores will be added to derive the points awarded.	<p>The cost formula expressed in the RFP will be used to separately score the implementation costs and fixed price operations cost. The sum of the two scores will be calculated to determine the points awarded.</p> <p>Bidder's Cost will be the sum of Implementation Cost + Base Operational cost + Extension Operational Costs. Optional Services will NOT be included.</p> <p>Bidder's cost score = (lowest cost/bidder cost) x maximum points</p> <p>Amendment: The RFP will be amended to incorporate this change.</p> <p>Note: Bidders will have the opportunity to update Cost Proposals during BAFO.</p>	Noridian
